

COAD will exhibit Speed-doors and Overhead-door

Participate in 2017 Korea International Plastics & Rubber Show(KOPLAS)

COAD participated in the 24th Korea International Plastics & Rubber Show (KOPLAS 2017) held at the KINTEX 1st exhibition site in Goyang City from March 7 to 11. COAD will exhibit Speed-doors and Overhead-door.

A typical product is the basic industrial door COAD-1. Unlike ordinary tent automatic doors and fabric shutters, it is made of thick 2T sheet. It is a high-speed shutter that is resistant to deformation and corrosion, even frame and bolt are all made of aluminum. The frame is equipped with high-strength windbars and windblocks (locking devices), which can not be easily removed in strong winds.

Among them, the recovery type industrial automatic door COAD-3, which has reduced the maintenance and repair costs, is focusing attention. Recovery Type automatic doors COAD-3 is made of zipper type, and when a collision occurs, the zipper is opened and restored automatically as it comes down. It is a speed door suitable for electronic / automobile industry that have many vehicles moving.

In addition to the speed door, COAD has a retractable overhead door, COAD-20, which is three times faster than conventional overhead doors. This product is equipped with speed door motor and features fast opening and closing force. In addition, this model has advantages to apply the chain drive method to prevent problems such as wire breakage, which is considered to be the main cause of the expenditure of after sales service.

Meanwhile, KOPLAS 2017 will be exhibited by 485 companies from 24 countries. The booth will be held at 1,320 booths, which is 10% higher than last time, and the latest materials from the domestic and overseas plastics rubber industry will be gathered together from eco-friendly materials to ultra- see.
